(54) Title: IMPROVED FORMULATION FOR SKIN-LIGHTENING AGENTS

(57) Abstract: A new topical formulation for skin lightening agents, such as 4-cycloalkyl resorcinols, has been discovered. This new formulations enhances the efficacy of the skin-lightening agent. It allows the physician, or consumer, to utilize a lower dose of the skin-lightening agent (i.e. to utilize a lower concentration of the skin lightening agent). The formulation utilizes a carrier which contains a hydroxyl compound in admixture with a co-solvent.
